Summary

DevOps Engineer with 1.5+ years of experience automating CI/CD pipelines and managing scalable cloud infrastructure using AWS, Kubernetes, Docker, Terraform, and Jenkins. Reduced deployment time by 70% and achieved zero-downtime releases through GitOps practices with ArgoCD and Helm. Skilled in Infrastructure as Code, container orchestration, and DevSecOps integration using Checkov, SonarQube, and Trivy. Experienced in enterprise cloud migration, high-availability infrastructure, and monitoring solutions with Prometheus and Grafana.

Experience

Logic Silicon Inc

July 2026 – Present

DevOps Engineer

Islamabad, Pakistan

- Managed Linux-based enterprise environments and containerized applications using Docker and Kubernetes (Amazon EKS & COLO RKE2), supporting 4+ production workloads with 90% improved reliability.
- Automated CI/CD pipelines using Jenkins, CloudBees Jenkins, and GitHub Actions, reducing deployment cycle time by 96%.
- Implemented GitOps deployments with ArgoCD and managed multi-cluster Kubernetes environments using Rancher, cutting manual cluster management effort by 75%.
- Configured Amazon EBS CSI Driver for Prometheus and Grafana, enabling persistent monitoring data across pod restarts and reducing monitoring data loss incidents by 99%.
- Secured Infrastructure as Code and application code using Checkov and SonarQube, reducing critical security findings by 99%.
- Implemented Kubernetes backup and disaster recovery using Velero, achieving 70% faster recovery time and zero data loss across 4+ workloads.
- Managed AWS services including VPC, EC2, EKS, AWS CLI, AWS MGN, and GuardDuty, supporting 4+ enterprise migration projects with improved cloud security posture.
- Automated enterprise application migration using Ansible, supporting HPC, Engineering Tools, Web Applications, and CaaS workloads, reducing migration time by 90%.
- Managed container image lifecycle using Harbor and configured F5 Hardware Load Balancers, reducing downtime by 90%.
- Collaborated with cross-functional teams to deliver secure, scalable, and highly available cloud-native solutions, supporting 4+ enterprise applications across production environments.

Rapids AI

June 2025 – June 2026

Jr. DevOps Engineer

Islamabad, Pakistan

- Deployed Hyperledger Fabric blockchain (Go chaincode, CouchDB, NestJS HLF Gateway) on Kubernetes, enabling permissioned production transactions with zero public infrastructure dependency.
- Containerized NestJS microservices via Docker & Docker Compose, achieving 100% cross-environment deployment consistency.
- Automated CI/CD via GitHub Actions to build & push Docker images to Docker Hub, reducing manual release effort by 100%.
- Implemented GitOps via Helm Charts for dynamic image tag updates, achieving zero manual deployments.
- Integrated Argo CD Image Updater & Istio for gRPC microservices, enabling auto cluster sync with 0% manual intervention.
- Optimized Kubernetes deployments via YAML & Helm with rolling updates, achieving 0% downtime during releases.
- Provisioned high-availability infrastructure on OpenStack (Magnum) & VMware, ensuring 99.9% uptime.

CyberSoft Vantage

June 2024 – September 2024

DevOps Intern

Islamabad, Pakistan

- Automated infrastructure deployment by developing scripts with Terraform, Ansible, and Python, reducing provisioning time by 40%.
- Improved deployment efficiency by optimizing CI/CD pipelines with Jenkins and Docker, achieving a 30% faster release cycle and minimizing downtime.
- Enhanced cloud scalability by configuring and managing AWS and Kubernetes clusters, leading to a 25% increase in system performance.
- Reduced incident response time by 50% by collaborating with cross-functional teams to troubleshoot and resolve infrastructure issues.

Education

Air University, Islamabad

2022 – 2026

Bachelor of Science in Information Technology

Technical Skills

DevOps & CI/CD: Git, GitHub, Jenkins, CloudBees Jenkins, GitHub Actions, ArgoCD

Containers & Orchestration: Docker, Kubernetes, Helm, Istio, Rancher, Harbor

Cloud & Infrastructure: AWS (EC2, EKS, VPC, Lambda, ECS, ECR, S3, Fargate, FSx, RDS, DynamoDB, ELB, Route 53, CloudWatch, CloudFront, IAM, KMS, Secrets Manager, ACM, WAF, Organizations, Control Tower, SSM, CLI, MGN, GuardDuty), OpenStack (Magnum), VMware, DigitalOcean, Vercel, Contabo, Terraform, Ansible

Security & Monitoring: TFLint, Tfsec, Checkov, SonarQube, Prometheus, Grafana, Velero

Programming & Scripting: Python, Bash, Go, FastAPI

Web & Databases: Nginx, MongoDB, MySQL, PostgreSQL, Kafka

Networking & Load Balancing: F5 Hardware Load Balancer

Operating Systems: Linux (Ubuntu, CentOS), Windows
